SUBJECT INDEX

Action spectra
  action spectra for photoinduced inactivation of bacteriophage T7 sensitized by 8-methoxypsoralen and angelicin, 497
Action spectroscopy
  photoreceptor pigments for photomovement of microorganisms: some spectroscopic and related studies, 1
Activation energy
  thermal activation of photoactivatable urocanase from *Pseudomonas putida*, 429
Adenine
  extent of formation of a dimeric adenine photoproduct in polynucleotides and DNA, 247
ADP-ribosylation
  differential response of excision proficient and deficient L5178Y cells to UVC irradiation and benzamide, 483
Aggregates
  fluorescence spectra of hematoporphyrin- and hematoporphyrin-diacetate aggregates in buffer solution, 369
  singlet oxygen formation in monomeric and aggregated porphyrin *c*, 81
Alginate
  sustained photoproduction of ammonia from nitrate or nitrite by permeabilized cells of the cyanobacterium *Phormidium laminosum*, 269
Alkyl disulphides
  a solar erythemal (sunburn) radiation dosimeter, 509
Ammonia
  sustained photoproduction of ammonia from nitrate or nitrite by permeabilized cells of the cyanobacterium *Phormidium laminosum*, 269
Angelicins
  action spectra for photoinduced inactivation of bacteriophage T7 sensitized by 8-methoxypsoralen and angelicin, 497
  determination of base specificity in 6,4,4′-trimethylangelicin photobinding to single-stranded DNA, 123
  6,4,4′-trimethylangelicin photoadduct formation in DNA: production and characterization of a specific monoclonal antibody, 101
Anthocyanin
  photoinduced delayed luminescence from certain plant tissues containing anthocyanins, betacyanins and chlorophyll, 259
Anthracycline
  laser time-resolved study of the interaction between anthracyclines and cardiolipin, 157
ATP
  optical probes of intradiskal processes in rod photoreceptors I: light-scattering study of ATP-dependent dark reactions, 529
  optical probes of intradiskal processes in rod photoreceptors II: light-scattering study of ATP-dependent light reactions, 549

Bacteriochlorophyll
  bacteriochlorophyll *a* triplet state and its interactions with bacterial carotenoids and oxygen, 237
Bacteriorhodopsin
  quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands II: bathointermediate formation in bacteriorhodopsin at room temperature, 397
Base specificity
  determination of base specificity in 6,4,4′-trimethylangelicin photobinding to single-stranded DNA, 123
Bilirubin
  UV excitable fluorescence of lumirubin, 419

© Elsevier Sequoia/Printed in The Netherlands

Blepharisma
effects of the molecular environment on some spectroscopic properties of *Blepharisma* photoreceptor pigment, 449
in vivo microspectrophotometric investigation of *Blepharisma japonicum*, 379
Butylated hydroxytoluene
effects of butylated hydroxytoluene upon PUVA-tumorigenesis and induction of ornithine decarboxylase activity in the mouse, 91

Cardiolipin
laser time-resolved study of the interaction between anthracyclines and cardiolipin, 157
Carotenoids
bacteriochlorophyll *a* triplet state and its interactions with bacterial carotenoids and oxygen, 237
Chlorophyll
photoinduced delayed luminescence from certain plant tissues containing anthocyanins, betacyanins and chlorophyll, 259
specific solvation of chlorophyll *b*: a site-selection study at 5 K, 25
stimulation of protochlorophyllide oxidoreductase by thioredoxin, 333
Chloroplast
the role of phospholipids in regulating photosynthetic electron transport activities: treatment of chloroplasts with phospholipase A2, 515
Chromophores
in vivo microspectrophotometric investigation of *Blepharisma japonnicum*, 379
Circular dichroism
UV–visible absorption and circular dichroism spectra of the subunits of C-phycocyanin I: quantitative assessment of the effect of chromophore–protein interaction in the a-subunit, 603
Compartmentalized systems
vesicular effect on the reactivity of anthracene derivatives towards singlet molecular oxygen, 113
Copper(II) tetracarboxyphthalocyanine
quantum yield of singlet molecular oxygen sensitization by copper(II) tetracarboxyphthalocyanine, 615
Cyanobacterium
sustained photoproduction of ammonia from nitrate or nitrite by permeabilized cells of the cyanobacterium *Phormidium laminosum*, 269
Cycling fraction
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands II: bathointermediate formation in bacteriorhodopsin at room temperature, 397
Cyclobuta-dithymidine
induction and repair of cyclobutadithymidine photoproducts in hamster skin by solar-simulated UV radiation, 17

Daunomycin
laser time-resolved study of the interaction between anthracyclines and cardiolipin, 157
DNA
a method for the determination of PUVA-induced *in vivo* irreversible binding of 8-methoxypsoralen (8-MOP) to epidermal lipids, proteins and DNA/RNA, 631
determination of base specificity in 6,4,4′-trimethylangelicin photobinding to single-stranded DNA, 123
extent of formation of a dimeric adenine photoproduct in polynucleotides and DNA, 247
induction and repair of cyclobutadithymidine photoproducts in hamster skin by solar-simulated UV radiation, 17
lysosomes: a possible target for psoralen photodamage, 437
UVA-induced binding of 8-methoxypsoralen to cells of *Saccharomyces cerevisiae*: separation and characterization of DNA photoadducts, 33
Dosimeter
a solar erythemal (sunburn) radiation dosimeter, 509

EBV
shuttle vectors for studying mutagenesis in mammalian cells, 143

Electron transfer
characterization of the α-terthienyl radical cation: evidence against electron transfer to oxygen *in vitro*, 411
Electron transport
senescence induced alteration in the electron transport in wheat leaf chloroplasts, 175
the role of phospholipids in regulating photosynthetic electron transport activities: treatment of chloroplasts with phospholipase A2, 515
ELISA
6,4,4′-trimethylangelicin photoadduct formation in DNA: production and characterization of a specific monoclonal antibody, 101
Energy transfer
photoinduced delayed luminescence from certain plant tissues containing anthocyanins, betacyanins and chlorophyll, 259
thermal deactivation and energy transfer in isolated photosystem 2 and light-harvesting complexes in poly(vinyl alcohol) film, 319
Enzyme stimulation
stimulation of protochlorophyllide oxidoreductase by thioredoxin, 333
Escherichia coli
excision-repair capacity of UV-irradiated strains of *Escherichia coli* and *Streptococcus pneumoniae*, estimated by plasmid recovery, 185
ESR
structural modifications of lipid vesicles by 8-methoxypsoralen, 359

Filtering effect
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands I: analytical method, 385
Flash photolysis
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands I: analytical method, 385
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands II: bathointermediate formation in bacteriorhodopsin at room temperature, 397
the role of oxygen in the photodegradation of lignin in solution, 473
Free radicals
molecular mechanism of naproxen photosensitization in red blood cells, 223
Furocoumarin
6,4,4′-trimethylangelicin photoadduct formation in DNA: production and characterization of a specific monoclonal antibody, 101

Gel chromatography
UVA-induced binding of 8-methoxypsoralen to cells of *Saccharomyces cerevisiae*: separation and characterization of DNA photoadducts, 33

Hematoporphyrin derivative
mechanisms of tumor necrosis induced by photodynamic therapy, 299
Hill oxidant
senescence induced alteration in the electron transport in wheat leaf chloroplasts, 175
Hydroxylapatite chromatography
UVA-induced binding of 8-methoxypsoralen to cells of *Saccharomyces cerevisiae*: separation and characterization of DNA photoadducts, 33
Hypochromism
screening hypochromism of biological macromolecules and suspensions, 625

5-Iminodaunomycin
laser time-resolved study of the interaction between anthracyclines and cardiolipin, 157
Immobilization
sustained photoproduction of ammonia from nitrate or nitrite by permeabilized cells of the cyanobacterium *Phormidium laminosum*, 269
Immunosorbent assay
induction and repair of cyclobutadithymidine photoproducts in hamster skin by solar-simulated UV radiation, 17
Indole
photochemical coupling of 5-bromo-1,3-dimethyluracil and its 6-alkyl

derivatives to 3-methylindole and Na-acetyl-L-tryptophan methyl ester, 565

Kinetics
laser-flash photolysis of 124 kDa oat phytochrome: studies concerning the late steps of P_{fr} formation, 209
the role of phospholipids in regulating photosynthetic electron transport activities: treatment of chloroplasts with phospholipase A2, 515

L5178Y cells
differential response of excision proficient and deficient L5178Y cells to UVC irradiation and benzamide, 483
Laser flash photolysis
characterization of the α-terthienyl radical cation: evidence against electron transfer to oxygen *in vitro*, 411
Leaf senescence
senescence induced alteration in the electron transport in wheat leaf chloroplasts, 175
Lettuce chloroplasts
time-resolved spectroscopy of photosynthetic systems using synchrotron radiation II: photosystem 2 preparations from lettuce, 65
Light-harvesting complexes
thermal deactivation and energy transfer in isolated photosystem 2 and light-harvesting complexes in poly(vinyl alcohol) film, 319
Light-scattering
optical probes of intradiskal processes in rod photoreceptors I: light-scattering study of ATP-dependent dark reactions, 529
optical probes of intradiskal processes in rod photoreceptors II: light-scattering study of ATP-dependent light reactions, 549
Lignin
the role of oxygen in the photodegradation of lignin in solution, 473
Lipids
a method for the determination of PUVA-induced *in vivo* irreversible binding of 8-methoxypsoralen (8-MOP) to epidermal lipids, proteins and DNA/RNA, 631
deposition of a photosensitive complex within a lecithin bilayer lipid membrane, 351
lysosomes: a possible target for psoralen photodamage, 437
structural modifications of lipid vesicles by 8-methoxypsoralen, 359
the influence of melanins on the photoperoxidation of lipids, 341
the role of phospholipids in regulating photosynthetic electron transport activities: treatment of chloroplasts with phospholipase A2, 515
Lipid vesicles
monomeric and aggregated pyrene and 16-(1-pyrenyl)hexadecanoic acid in small, unilamellar phosphatidylcholine vesicles and ethanol-buffer solutions, 53
Liposomes
monomeric and aggregated pyrene and 16-(1-pyrenyl)hexadecanoic acid in small, unilamellar phosphatidylcholine vesicles and ethanol-buffer solutions, 53
the influence of melanins on the photoperoxidation of lipids, 341
the photophysical properties of porphycene incorporated in small unilamellar lipid vesicles, 193
Low temperatures
specific solvation of chlorophyll *b*: a site-selection study at 5 K, 25
Luminescence
photoinduced delayed luminescence from certain plant tissues containing anthocyanins, betacyanins and chlorophyll, 259
the influence of melanins on the photoperoxidation of lipids, 341
the role of phospholipids in regulating photosynthetic electron transport activities: treatment of chloroplasts with phospholipase A2, 515
Lumirubin
UV excitable fluorescence of lumirubin, 419
Lysosomes
lysosomes: a possible target for psoralen photodamage, 437

Macromolecules
screening hypochromism of biological macromolecules and suspensions, 625

Mastigocladus laminosus
UV–visible absorption and circular dichroism spectra of the subunits of C-phycocyanin I: quantitative assessment of the effect of chromophore–protein interaction in the a-subunit, 603
Melanins
the influence of melanins on the photoperoxidation of lipids, 341
Membranes
deposition of a photosensitive complex within a lecithin bilayer lipid membrane, 351
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands II: bathointermediate formation in bacteriorhodopsin at room temperature, 397
structural modifications of lipid vesicles by 8-methoxypsoralen, 359
8-Methoxypsoralen
action spectra for photoinduced inactivation of bacteriophage T7 sensitised by 8-methoxypsoralen and angelicin, 497
a method for the determination of PUVA-induced *in vivo* irreversible binding of 8-methoxypsoralen (8-MOP) to epidermal lipids, proteins and DNA/RNA, 631
effects of butylated hydroxytoluene upon PUVA-tumorigenesis and induction of ornithine decarboxylase activity in the mouse, 91
lysosomes: a possible target for psoralen photodamage, 437
structural modifications of lipid vesicles by 8-methoxypsoralen, 359
Microscope photometry
in vivo microspectrophotometric investigation of *Blepharisma japonicum*, 379
Microsomes
the influence of melanins on the photoperoxidation of lipids, 341
Molecular dosimetry
UVA-induced binding of 8-methoxypsoralen to cells of *Saccharomyces cerevisiae*: separation and characterization of DNA photoadducts, 33
Monoclonal antibodies
6,4,4′-trimethylangelicin photoadduct formation in DNA: production and characterization of a specific monoclonal antibody, 101
Mutagenesis
shuttle vectors for studying mutagenesis in mammalian cells, 143

Oat
laser-flash photolysis of 124 kDa oat phytochrome: studies concerning the late steps of P_{fr} formation, 209
Optical spectroscopy
photoreceptor pigments for photomovement of microorganisms: some spectroscopic and related studies, 1
Orientation
thermal deactivation and energy transfer in isolated photosystem 2 and light-harvesting complexes in poly(vinyl alcohol) film, 319
Ornithine decarboxylase
effects of butylated hydroxytoluene upon PUVA-tumorigenesis and induction of ornithine decarboxylase activity in the mouse, 91
Overlapping spectra
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands I: analytical method, 385
Oxygen radicals
generation of free radicals by photoexcitation of pheophorbide *a*, haematoporphyrin and protoporphyrin, 593

Permeabilized cells
sustained photoproduction of ammonia from nitrate or nitrite by permeabilized cells of the cyanobacterium *Phormidium laminosum*, 269
Pheophorbide *a*
generation of free radicals by photoexcitation of pheophorbide *a*, haematoporphyrin and protoporphyrin, 593
Phormidium laminosum
sustained photoproduction of ammonia from nitrate or nitrite by permeabilized cells of the cyanobacterium *Phormidium laminosum*, 269

Phosphatidylcholine
monomeric and aggregated pyrene and 16-(1-pyrenyl)hexadecanoic acid in small, unilamellar phosphatidylcholine vesicles and ethanol-buffer solutions, 53
Phospholipase
the role of phospholipids in regulating photosynthetic electron transport activities: treatment of chloroplasts with phospholipase A2, 515
Photoactivation
thermal activation of photoactivatable urocanase from *Pseudomonas putida*, 429
Photoadduct
6,4,4′-trimethylangelicin photoadduct formation in DNA: production and characterization of a specific monoclonal antibody, 101
Photobinding
determination of base specificity in 6,4,4′-trimethylangelicin photobinding to single-stranded DNA, 123
lysosomes: a possible target for psoralen photodamage, 437
Photochromism
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands I: analytical method, 385
Photocoupling
photochemical coupling of 5-bromo-1,3-dimethyluracil and its 6-alkyl derivatives to 3-methylindole and Na-acetyl-L-tryptophan methyl ester, 565
Photodynamic therapy
mechanisms of tumor necrosis induced by photodynamic therapy, 299
Photoelectric effects
deposition of a photosensitive complex within a lecithin bilayer lipid membrane, 351
Photoexcitation efficiency
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands I: analytical method, 385
Photohemolysis
molecular mechanism of naproxen photosensitization in red blood cells, 223
Photoinactivation
action spectra for photoinduced inactivation of bacteriophage T7 sensitized by 8-methoxypsoralen and angelicin, 497
Photomovement
photoreceptor pigments for photomovement of microorganisms: some spectroscopic and related studies, 1
Photopigments
photoreceptor pigments for photomovement of microorganisms: some spectroscopic and related studies, 1
Photoreceptors
effects of the molecular environment on some spectroscopic properties of *Blepharisma* photoreceptor pigment, 449
in vivo microspectrophotometric investigation of *Blepharisma japonicum*, 379
optical probes of intradiskal processes in rod photoreceptors I: light-scattering study of ATP-dependent dark reactions, 529
optical probes of intradiskal processes in rod photoreceptors II: light-scattering study of ATP-dependent light reactions, 549
photoreceptor pigments for photomovement of microorganisms: some spectroscopic and related studies, 1
Photosensitization
action spectra for photoinduced inactivation of bacteriophage T7 sensitized by 8-methoxypsoralen and angelicin, 497
generation of free radicals by photoexcitation of pheophorbide *a*, haematoporphyrin and protoporphyrin, 593
mechanisms of tumor necrosis induced by photodynamic therapy, 299
molecular mechanism of naproxen photosensitization in red blood cells, 223
singlet oxygen formation in monomeric and aggregated porphyrin *c*, 81
vesicular effect on the reactivity of anthracene derivatives towards singlet molecular oxygen, 113

Photosynthesis
specific solvation of chlorophyll *b*: a site-selection study at 5 K, 25
time-resolved spectroscopy of photosynthetic systems using synchrotron radiation II: photosystem 2 preparations from lettuce, 65
Photosystem 1
on the multiple forms of cyanobacterial PS 1 complex, 575
Photosystem 2
thermal deactivation and energy transfer in isolated photosystem 2 and light-harvesting complexes in poly(vinyl alcohol) film, 319
time-resolved spectroscopy of photosynthetic systems using synchrotron radiation II: photosystem 2 preparations from lettuce, 65
Phototherapy
singlet oxygen formation in monomeric and aggregated porphyrin *c*, 81
Phycocyanin
UV–visible absorption and circular dichroism spectra of the subunits of C-phycocyanin I: quantitative assessment of the effect of chromophore–protein interaction in the a-subunit, 603
Phytochrome
laser-flash photolysis of 124 kDa oat phytochrome: studies concerning the late steps of P_{fr} formation, 209
Pigment–protein complexes
on the multiple forms of cyanobacterial PS 1 complex, 575
Plasmid assay
excision-repair capacity of UV-irradiated strains of *Escherichia coli* and *Streptococcus pneumoniae*, estimated by plasmid recovery, 185
Polypeptides
on the multiple forms of cyanobacterial PS 1 complex, 575
Porphycene
the photophysical properties of porphycene incorporated in small unilamellar lipid vesicles, 193
Porphyrins
generation of free radicals by photoexcitation of pheophorbide *a*, haematoporphyrin and protoporphyrin, 593
singlet oxygen formation in monomeric and aggregated porphyrin *c*, 81
Protochlorophyllide
stimulation of protochlorophyllide oxidoreductase by thioredoxin, 333
Proton translocation
optical probes of intradiskal processes in rod photoreceptors I: light-scattering study of ATP-dependent dark reactions, 529
optical probes of intradiskal processes in rod photoreceptors II: light-scattering study of ATP-dependent light reactions, 549
Pseudomonas putida
thermal activation of photoactivatable urocanase from *Pseudomonas putida*, 429
Psoralen
UVA-induced binding of 8-methoxypsoralen to cells of *Saccharomyces cerevisiae*: separation and characterization of DNA photoadducts, 33
PUVA
a method for the determination of PUVA-induced *in vivo* irreversible binding of 8-methoxypsoralen (8-MOP) to epidermal lipids, proteins and DNA/RNA, 631
effects of butylated hydroxytoluene upon PUVA-tumorigenesis and induction of ornithine decarboxylase activity in the mouse, 91
lysosomes: a possible target for psoralen photodamage, 437
Pyrene
monomeric and aggregated pyrene and 16-(1-pyrenyl)hexadecanoic acid in small, unilamellar phosphatidylcholine vesicles and ethanol-buffer solutions, 53
Pyrimidine
extent of formation of a dimeric adenine photoproduct in polynucleotides and DNA, 247

Quantum efficiency
quantum yield and extinction measurements in strongly overlapping reactant and photoproduct absorption bands II: bathointermediate formation in bacteriorhodopsin at room temperature, 397

Quantum mechanics
UV–visible absorption and circular dichroism spectra of the subunits of C-phycocyanin I: quantitative assessment of the effect of chromophore–protein interaction in the a-subunit, 603
Quinonoid radicals
the role of oxygen in the photodegradation of lignin in solution, 473

Repair
excision-repair capacity of UV-irradiated strains of *Escherichia coli* and *Streptococcus pneumoniae*, estimated by plasmid recovery, 185
Reporter group
laser-flash photolysis of 124 kDa oat phytochrome: studies concerning the late steps of P_{fr} formation, 209
Retrovirus
shuttle vectors for studying mutagenesis in mammalian cells, 143

Saccharomyces cerevisiae
UVA-induced binding of 8-methoxypsoralen to cells of *Saccharomyces cerevisiae*: separation and characterization of DNA photoadducts, 33
Scenedesmus obliquus
stimulation of protochlorophyllide oxidoreductase by thioredoxin, 333
Shuttle vectors
shuttle vectors for studying mutagenesis in mammalian cells, 143
Singlet oxygen
bacteriochlorophyll *a* triplet state and its interactions with bacterial carotenoids and oxygen, 237
molecular mechanism of naproxen photosensitization in red blood cells, 223
photosensitization with α-terthienyl: the formation of superoxide ion in aqueous media, 165
quantum yield of singlet molecular oxygen sensitization by copper(II) tetracarboxyphthalocyanine, 615
singlet oxygen formation in monomeric and aggregated porphyrin *c*, 81
the role of oxygen in the photodegradation of lignin in solution, 473
vesicular effect on the reactivity of anthracene derivatives towards singlet molecular oxygen, 113
Site-selection spectroscopy
specific solvation of chlorophyll *b*: a site-selection study at 5 K, 25
Skin tumorigenesis
effects of butylated hydroxytoluene upon PUVA-tumorigenesis and induction of ornithine decarboxylase activity in the mouse, 91
Solar radiation
a solar erythemal (sunburn) radiation dosimeter, 509
Solar simulator
induction and repair of cyclobutadiethymidine photoproducts in hamster skin by solar-simulated UV radiation, 17
Solvent effects
effects of the molecular environment on some spectroscopic properties of *Blepharisma* photoreceptor pigment, 449
photosensitization with α-terthienyl: the formation of superoxide ion in aqueous media, 165
Specific solvation
specific solvation of chlorophyll *b*: a site-selection study at 5 K, 25
Spectroradiometer
a solar erythemal (sunburn) radiation dosimeter, 509
Spin trap technique
generation of free radicals by photoexcitation of pheophorbide *a*, haematoporphyrin and protoporphyrin, 593
Streptococcus pneumoniae
excision-repair capacity of UV-irradiated strains of *Escherichia coli* and *Streptococcus pneumoniae*, estimated by plasmid recovery, 185
Superoxide
the influence of melanins on the photoperoxidation of lipids, 341
Superoxide anion
characterization of the α-terthienyl radical cation: evidence against electron transfer to oxygen *in vitro*, 411
photosensitization with α-terthienyl: the formation of superoxide ion in aqueous media, 165
Supramolecular organization
on the multiple forms of cyanobacterial PS 1 complex, 575

Surfactant vesicles
vesicular effect on the reactivity of anthracene derivatives towards singlet molecular oxygen, 113
Suspensions
screening hypochromism of biological macromolecules and suspensions, 625
SV40
shuttle vectors for studying mutagenesis in mammalian cells, 143
Synchrotron radiation
time-resolved spectroscopy of photosynthetic systems using synchrotron radiation II: photosystem 2 preparations from lettuce, 65
Synechococcus elongatus
on the multiple forms of cyanobacterial PS 1 complex, 575

T7 phage
action spectra for photoinduced inactivation of bacteriophage T7 sensitized by 8-methoxypsoralen and angelicin, 497
α-Terthienyl
characterization of the α-terthienyl radical cation: evidence against electron transfer to oxygen *in vitro*, 411
photosensitization with α-terthienyl: the formation of superoxide ion in aqueous media, 165
Thermal activation
thermal activation of photoactivatable urocanase from *Pseudomonas putida*, 429
Thermal deactivation
thermal deactivation and energy transfer in isolated photosystem 2 and light-harvesting complexes in poly(vinyl alcohol) film, 319
Thioredoxin
stimulation of protochlorophyllide oxidoreductase by thioredoxin, 333
Time-resolved spectroscopy
laser time-resolved study of the interaction between anthracyclines and cardiolipin, 157
singlet oxygen formation in monomeric and aggregated porphyrin *c*, 81
time-resolved spectroscopy of photosynthetic systems using synchrotron radiation II: photosystem 2 preparations from lettuce, 65
Triplet lifetimes
the photophysical properties of porphycene incorporated in small unilamellar lipid vesicles, 193
Tryptophan
photochemical coupling of 5-bromo-1,3-dimethyluracil and its 6-alkyl derivatives to 3-methylindole and Na-acetyl-L-tryptophan methyl ester, 565
Tumor necrosis
mechanisms of tumor necrosis induced by photodynamic therapy, 299

Uracil
photochemical coupling of 5-bromo-1,3-dimethyluracil and its 6-alkyl derivatives to 3-methylindole and Na-acetyl-L-tryptophan methyl ester, 565
Urocanase
thermal activation of photoactivatable urocanase from *Pseudomonas putida*, 429
UV-A
structural modifications of lipid vesicles by 8-methoxypsoralen, 359
UVC
differential response of excision proficient and deficient L5178Y cells to UVC irradiation and benzamide, 483

Vibrational structure
specific solvation of chlorophyll *b*: a site-selection study at 5 K, 25
Viscosity
laser-flash photolysis of 124 kDa oat phytochrome: studies concerning the late steps of P_{fr} formation, 209

Wheat chloroplasts
senescence induced alteration in the electron transport in wheat leaf chloroplasts, 175
